Study of Insurance Economics

Geneva Association Information Newsletter

2-08
January 2008

Press Release

NEW GENEVA ASSOCIATION VIRTUAL LIBRARY

As part of The Geneva Association's new website a virtual library for risk and insurance related documents has been set up. This will allow visitors access to the large amount of information that The Geneva Association created over more than 35 years of operation. It will make The Geneva Association's Virtual Library one of the world's leading repositories of original research work on risk and insurance.

Publications included in the virtual library are:

- Geneva Association Newsletter articles in the areas of risk management, insurance and finance, insurance regulation, insurance economics, old-age security, as well as health and ageing.
- Presentations and articles from the "Etudes et Dossiers" Working Papers Series of The Geneva Association.
- Abstracts of *The Geneva Papers on Risk and Insurance – Issues and Practice*.
- Abstracts of *The Geneva Risk and Insurance Review*.
- Other Geneva Association Research Reports and Discussion Papers.

The library also contains links to the publisher of *The Geneva Papers on Risk and Insurance – Issues and Practice* and *The Geneva Risk and Insurance Review*. It allows the direct search of those resources and the consultation of published articles.

The project team has made over 1'000 original documents, which were published by The Geneva Association over the last 7 years, available for the start of the virtual library's operations. This set of documents is part of a total of over 6'000 articles and papers, some dating back to the 1970s, which will be put online in the space of the next two to three years approximately. Apart from some documents which are restricted and can only be accessed with a special login, most of the Association's documents are freely available.

This new tool will allow researchers and other persons to directly access the information using a powerful search engine. The publications can be searched through an easy-to-use direct function, by keywords as well as through more advanced search functions.

To access the virtual library, please go to <http://www.genevaassociation.org>.

The Geneva Association – Risk and Insurance Economics and Research

The International Association for the Study of Insurance Economics, or by its short name "The Geneva Association", is a unique world organisation formed by a maximum of 80 chief executive officers (CEOs) from the most important insurance companies in the world. Our main goal is to research the growing importance of worldwide insurance activities in all sectors of the economy. We try to identify fundamental trends and strategic issues where insurance plays a substantial role or which influence the insurance sector. In parallel, we develop and encourage various initiatives concerning the evolution – in economic and cultural terms – of risk management and the notion of uncertainty in the modern economy.

The Geneva Association also acts as a forum for its members, providing a worldwide unique platform for the top insurance CEOs. We organise the framework for our members in order that they may exchange ideas and discuss key strategic issues, especially at the General Assembly where once per year over 50 of the top insurance CEOs gather. The Geneva Association serves as a catalyst for progress in this unprecedented period of fundamental change in the insurance industry and its growing importance for the further development of the modern economy. It is a non-profit organisation.
