“I was honoured to be appointed Chairman of the Geneva Association in 2024, at a pivotal moment for insurance companies around the world.”

Lee Yuan Siong

Letter from the Chairman

I was honoured to be appointed Chairman of the Geneva Association in 2024, at a pivotal moment for insurance companies around the world.

Over the past year, the industry has navigated a complex landscape shaped by geopolitical tensions, economic uncertainty, accelerating climate risks, and rapid technological advancement - forces that carry profound implications for insurers globally. In this context, I look forward to strengthening the Geneva Association's role as a thought leader and convener, deepening its impact through stakeholder engagement and timely dialogue on the issues that matter most to our industry.

The progress we made in 2024 lays a strong foundation for the path ahead of us. Our research addresses some of the industry's most urgent challenges and opportunities. A two-part series on climate tech explored the Insurability of emerging technologies, culminating in the development of an 'Insurability Readiness Framework'. We also published a study on the impact of climate change on life and health insurers, an often-overlooked area, despite increasing concerns about rising morbidity and mortality risks.

On the technology front, our work examined the growing role of digital platforms in insurance distribution, while our dedicated conference on Generative AI brought together experts and executives to explore its transformative potential and emerging risks.

These themes were central to the 2024 General Assembly in Kyoto, our 51st gathering, where member CEOs engaged in high-level dialogue on the evolving risk environment and the future of insurance. The event reaffirmed the Geneva Association's unique role as a global platform for collaboration in an increasingly fragmented world.

Our communication efforts also gained momentum, with a 14% increase in audience reach and a 30% growth in LinkedIn followers in 2024. These figures reflect both the relevance of our work and the rising demand for our insights.

Looking ahead, we remain firmly anchored in the Geneva Association's mission: 'Insurance for a Better World'. In an era of mounting global risks and shifting societal expectations, this mission resonates more strongly than ever. Our focus will be on equipping the industry to navigate complexity, unlock new opportunities, and deliver greater societal value.

I thank our members and stakeholders for their continued support and engagement, and I look forward to advancing our shared mission in the year ahead.

Lee Yuan Siong

Chairman, Geneva Association

Group Chief Executive & President, AIA Group

Managing Director's Message

In an era of rapid technological advancements and digital transformation, access to information has never been greater. Yet, the challenge of distinguishing fact from fiction has also intensified. In this dynamic landscape, objective research organisations like ours play a crucial role in fostering clarity, trust, and informed decision-making.

Throughout 2024, we remained steadfast in our mission to promote fact-driven discourse on risks and insurance. Our research on financial inclusion in advanced economies shed light on widening protection gaps, particularly among low-income earners, Gen Z, and migrants. By identifying barriers such as low risk awareness, limited availability of and access to insurance, and unaffordability, our findings emphasise the need for targeted insurance solutions that empower individuals and strengthen financial resilience.

Amid growing cyber risks and efforts to expand insurability, our research explored how alternative risk transfer (ART) solutions, including cyber insurance-linked securities (ILS), could bolster market capacity. To accelerate growth, we outlined steps to broaden cyber risk distribution and ensure sustainable protection.

Recognising the importance of shaping an honest public discussion around these issues, in 2024 we held a special exchange with the global insurance media, covering topics from the affordability of insurance in a changing climate to the industry's response to cyber risks. By fostering constructive dialogue, we aim to reinforce insurers' evolving role in addressing protection gaps and emerging risks.

Building on this momentum, a new Director of External Stakeholder Engagement role will help deepen our connections to other industry associations, policymakers, regulators, and multilateral organisations, ensuring our research and insights reach key decision-makers at a global level. Strengthening these relationships positions us to drive even greater impact in the years ahead.

As we navigate an increasingly complex and uncertain world, the need for independent research has never been greater. We remain committed – together with our members, partners and stakeholders – to advancing understanding, strengthening resilience, and shaping the future of risk and insurance.

Jad Ariss

Managing Director

Geneva Association

“As we navigate an increasingly complex and uncertain world, the need for independent research has never been greater.”

Jad Ariss

Overview of the Geneva Association

The Geneva Association, founded in 1973, is the only global association of insurance companies; our members are re/insurance CEOs.

Based on rigorous research on risks conducted in collaboration with our members, academic institutions, and multilateral organisations, our mission is to:

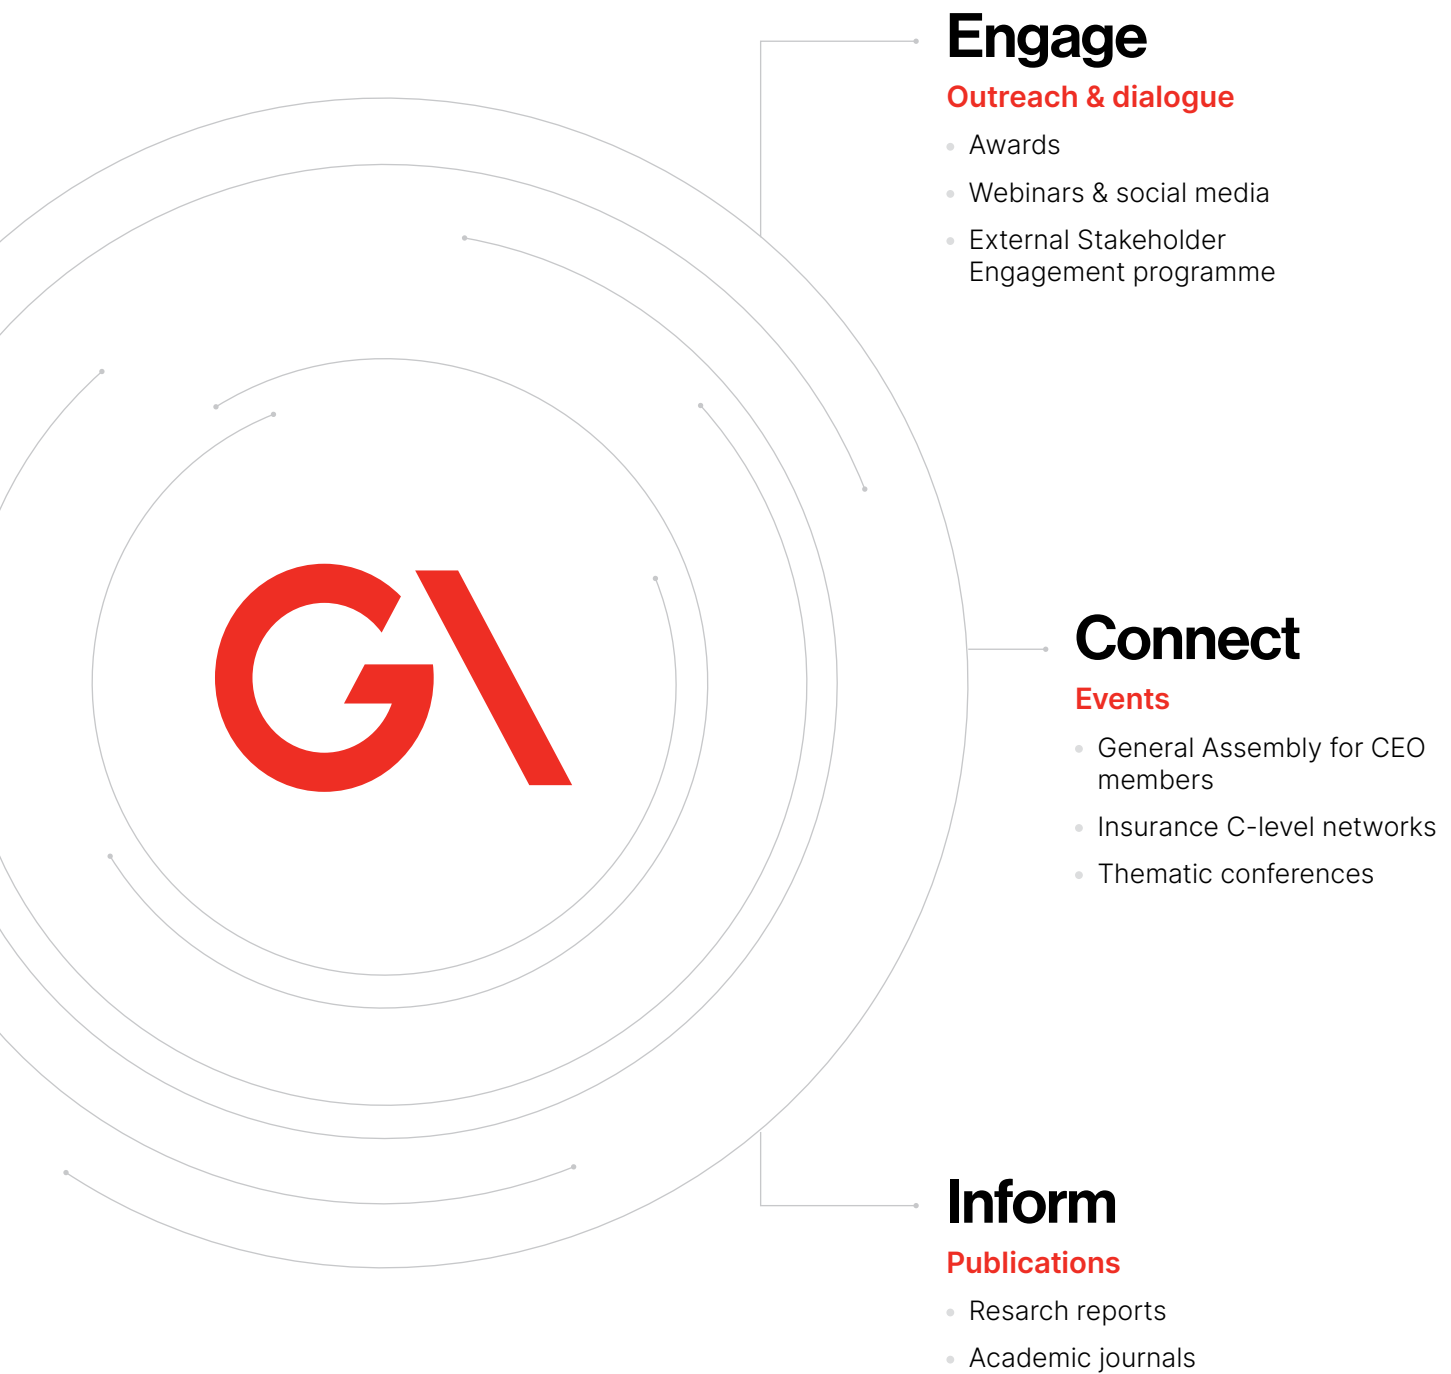

Identify and investigate key trends and risk areas that are likely to shape or impact the insurance industry, and develop corresponding recommendations for the industry and policymakers.

Provide a dialogue platform for our members, policymakers, academics, multilateral and non-governmental organisations.

Highlight the positive contributions of insurance to building more resilient and prosperous economies and societies and thus, a more sustainable world.

Chairman

Lee Yuan Siong
Group Chief Executive
& President, AIA Group

New Chairman and Vice Chairman

Lee Yuan Siong, Group Chief Executive & President of AIA Group, was appointed Chairman of the Geneva Association at the Geneva Association's spring 2024 board meeting in Kyoto. **Lard Friese**, CEO of Aegon, became Vice Chairman at the autumn 2024 board meeting in London.

New research focuses

Two new research work streams were launched in 2024: Financial Inclusion and Macro & Geoeconomic Shifts. The first reports under these work streams were published in November 2024 (Inclusive Insurance in Advanced Economies) and January 2025 (Geoeconomic Fragmentation and Insurance), respectively.

Vice Chairman

Lard Friese
CEO, Aegon

Media Briefing on Global Risks & Insurance

This new initiative engaged the insurance media, in an off-the-record exchange, on key issues shaping the future of risk management. Discussions focused on the availability and affordability of insurance in light of increasing climate risks, how insurers are responding to growing cyber risks, opportunities and risks for insurers related to increased longevity, and narrowing insurance protection gaps.

Evolved event programme

The Geneva Association's first-ever, in-person Digital Technologies Conference took place in Milan in 2024. The organisation's annual Programme on Regulation & Supervision (PROGRES) Seminar and Climate Change & Environment Conference were also held in the US for the first time.

Staff changes

The Geneva Association announced two key staff changes in December 2024. **Darren Pain**, Director Cyber and Evolving Liability, was appointed Director of Research and will oversee the Geneva Association's research portfolio.

Dennis Noordhoek, former Director Public Policy & Regulation, assumed the new role of Director of External Stakeholder Engagement, spearheading efforts to deepen relationships with key organisations and amplify our global reach.

Climate Change & Environment

The Geneva Association's Climate Change & Environment research explores climate-related challenges and, through collaboration with re/insurers and experts, seeks to innovate risk management solutions and investment strategies that support decarbonisation.

Climate Tech and Insurance

#Report

This two-part research series explores how insurers can help facilitate the commercialisation of climate tech. The first report examines the climate tech commercialisation landscape and presents perspectives of C-level insurance executives on what the industry can offer in this space. The second report focuses on how the insurability of climate technologies can be enhanced and presents a novel 'Insurability Readiness Framework' that can be used to pinpoint the areas within climate technologies that pose the greatest challenges to insurability.

15–16 April 2024, Zurich

Climate Tech for Industrial Decarbonisation: What can re/insurers offer?

#Conference

Drawing on the Geneva Association's research on climate tech and insurance, this conference, hosted by Swiss Re, gathered executives and leading experts engaged in the commercialisation and deployment of climate technologies to explore how re/insurers can help overcome related hurdles.

15–16 October 2024, Boston

On the Frontline of Climate Change: The essential role of insurance

#Conference

This conference, hosted by Liberty Mutual, explored how to enhance the insurability of physical climate risk and how insurers can contribute to climate resilience through prevention, innovative insurance solutions, and cross-sectoral collaboration.

[Read the summary](#)

Health & Demography

The Geneva Association analyses longevity and health topics, such as retirement security and the impact of climate change on health, and the opportunities and challenges these present to insurers.

Climate Change: What does the future hold for health and life insurance?

#Report

This report assesses the implications of climate change for life and health insurers, which are typically less well understood than for property insurers. The report classifies climate-related life and health risks into four categories: acute, chronic, transition, and litigation. It finds that though the short-term consequences for the sector have so far been limited, they can be expected to increase as the frequency and severity of climate events continue to rise.

An aerial, high-angle photograph of a city street. A prominent white-striped crosswalk cuts diagonally across the dark asphalt. Several pedestrians are captured in motion, crossing the street. Their shadows are cast long and dark on the pavement, indicating a low sun position. The overall scene conveys a sense of urban activity and movement.

Financial Inclusion

Major trends are changing the face of our societies: growing income and wealth inequality, expansion of the gig economy, and massive urbanisation. Our research explores the most relevant socioeconomic trends and their impact on risk to help pinpoint insurance solutions for more resilient societies.

Inclusive Insurance in Advanced Economies: Alleviating strains on society

#Report

This report explores inclusion gaps for six demographic groups in developed countries – the elderly, Gen Z, self-employed workers, low-income earners, migrants, and the chronically ill. The report identifies four key barriers to inclusive insurance – unaffordability, unavailability, inaccessibility and lack of awareness – and suggests concrete steps for insurers to overcome these obstacles.

Digital Technologies

Technology is fundamentally transforming business models across all industries. The Geneva Association looks at the most transformational technologies for re/insurers, focusing mainly on how they can best be utilised for customers and society in terms of business models, value sharing and ethics.

Digital Platform Ecosystems in Insurance: Connecting with customers in new ways

#Report

Digital platform ecosystems, which are networks of systems that interconnect to provide a variety of products and services, offer benefits to insurers and their customers. This report sets out to better understand the extent to which insurers are using these ecosystems – and how – via a survey of Geneva Association member companies.

19–20 March 2024, Milan

Generative AI and the Future of Insurance

#Conference

AI technologies have the potential to transform insurance but there is still much for insurers to figure out in order to drive their effective and safe adoption. This conference, hosted by Generali, focused on how generative AI in particular will impact the future of insurance and how to navigate its risks and benefits.

Cyber

The Geneva Association's cyber work stream generates insight into the challenges of treating cyber as an insurable peril and explores how insurance can contribute to mitigating this risk.

Catalysing Cyber Risk Transfer to Capital Markets: Catastrophe bonds and beyond

#Report

This report examines the potential of alternative risk transfer (ART) solutions, including insurance-linked securities (ILS) such as cyber catastrophe bonds, to facilitate broader distribution of peak cyber risks to financial markets.

11–12 November 2024, New York

Enhancing the Role of Insurance in an Increasingly Hostile Cyber World

#Conference

This conference, hosted by AXIS Capital, explored recent shifts in the cyber risk landscape and how far re/insurance can play a bigger role in boosting society's cyber resilience – in particular, what innovations are required to enable the sector to assume more of the rare but extreme cyber risks.

Public Policy & Regulation

Insurance regulations aim to protect policyholders and promote financial stability. The Geneva Association studies how public policy and regulation shape the way insurers operate and their contributions to society.

Liquidity Risk in Insurance: A topical perspective

#Research brief

This report explores liquidity risk in insurance. It examines how liquidity risk differs between banking and insurance, as well as by line of business within insurance, and the techniques insurers employ to manage it.

Lee Yuan Siong, Group Chief Executive & President, AIA Group, and Chairman, Geneva Association

16–17 September, Washington, D.C.

Programme on Regulation & Supervision (PROGRES) Seminar

Building Global Resilience through Agile Regulation

#Conference

The Geneva Association's annual PROGRES Seminar brings together the re/insurance and regulatory/supervisory communities to exchange views on important developments in insurance. The 2024 edition, held in the US for the first time, explored the impact of regulation and supervision on the insurance industry's mission to build societal resilience, particularly in supporting society through current economic and geopolitical challenges, the effects of climate change, and growing protection gaps.

General Assembly

6–7 June, Kyoto, hosted by Tokio Marine and Nippon Life

The Geneva Association's General Assembly is a two-day event, held exclusively for member CEOs. The 51st edition, which took place in Kyoto on 6–7 June and was hosted by Tokio Marine and Nippon Life, gathered 54 GA members to discuss topics including climate change, longevity, and technological transformation and their implications for insurers.

Academic work

The Geneva Papers on Risk and Insurance – Issues and Practice

The Geneva Association began publishing *The Geneva Papers on Risk and Insurance* in 1976. Since its inception by the Association's first president, Professor Raymond Barre, the journal has had two objectives: 1) to help elaborate and confront key strategic issues for the insurance sector; and 2) to stimulate a constructive dialogue between the insurance sector and its social and economic partners.

The following issues of *The Geneva Papers* were published in 2024:

January 2024

Volume 49, Issue 1

This issue contains articles on sustainable investing in the insurance industry, ILS for natural catastrophes, and determinants of insurance penetration in Africa.

April 2024

Volume 49, Issue 2

Special issue on Longevity Risks

Articles in this special issue, edited by David Blake and Johnny Li, explore the challenges associated with increasing lifespans, including strains on healthcare systems and the growing need for long-term care.

[Read the summary](#)

July 2024

Volume 49, Issue 3

Special issue on Microinsurance

This half special issue, edited by Martin Eling and Yi Yao, looks at the impact of microinsurance in developing countries like Ghana and Turkey.

October 2024

Volume 49, Issue 4

This issue includes articles examining the influence of insurance on infrastructure development in Sub-Saharan Africa and the impact of the Russian-Ukraine war on large insurance firms.

Ernst Meyer Prize

The Geneva Association Ernst Meyer Prize has been awarded annually since 1976 for university research in the form of a doctoral thesis that makes a significant and original contribution to the study of risk and insurance economics.

The joint winners of the 2024 Ernst Meyer Prize were **Sebastian Hinck** (PhD, University of Hamburg) and **Jieyu Lin** (PhD, Tsinghua University) for work that advances the understanding of insurance markets.

Outreach

Maintaining strong relationships with our core stakeholders – including member insurance companies, industry associations, policymakers, regulators, multilateral organisations, and the media – is central to the Geneva Association's impact & outreach strategy. This section highlights key outreach activities in 2024.

Communicating for impact

Through high-quality research, impactful events, media outreach, and social media activity, the Geneva Association continued to examine and highlight key trends shaping the insurance sector in 2024. Our work was cited highly in the media, indicating growing awareness of and interest in what we do. We also expanded our reach, with a 14% increase in our email audience and a 30% rise in LinkedIn followers.
