

Call for Papers

Cyber Risk and Insurance Special Issue of *The Geneva Papers on Risk and Insurance – Issues and Practice* (October 2020)

This special issue will be prepared in cooperation with guest editor Prof. M. Martin Boyer (*Power Corporation of Canada Research Chair* at HEC Montréal). We encourage you to submit contributions related to the following areas:

- Definition, assessment, costs, and detrimental effects of cyber risk
- Modelling, empirical analysis, and management of cyber risk
- Innovative ways to manage cyber risk through insurance
- Impacts of cyber risk on society and individuals
- Cyber terrorism, cyberwarfare and State sponsored cyber activity
- Insurability of cyber risk
- (Re)insurance markets and insurance products to cover cyber risk
- Validity of the CL380 clause — fit for purpose or ready for progression and clarity
- Regulatory demands and global macro-prudential standards for cyber risk
- Public-private partnership in creating cyber risk insurance pools
- Maturity path of the cyber insurance market
- Perception of cyber risk and cyber insurance
- Data availability and cyber underwriting decisions
- Clinical research and field study on cyber risk events

Suggestions for other topics will be considered by the editor.

All contributions will go through a peer review process. Papers should be submitted electronically via the website of *The Geneva Papers* (<https://gpp.msubmit.net/cgi-bin/main.plex>) by **16 September 2019** at the latest.
