The Geneva Papers on Risk and Insurance
Call for papers

The Geneva Association is pleased to announce a special **October 2021** issue of *The Geneva Papers on Risk and Insurance – Issues and Practice* on

Climate Risks and Insurance

We encourage you to submit contributions dealing with the effects of climate risks on the ability of insurers, governments and countries to manage these risks efficiently. Papers could deal *inter alia* with the following issues:

- The role of insurance in managing climate risks (e.g. physical risk, transition risk)

- How insurance can help with the allocation of financial resources to increase economic resilience to climate change (climate finance)

- The role of risk transfer and insurance solutions to protect governments against budget volatility and ensure immediate access to liquidity post disaster

- The role of risk financing and insurance strategies in incentivising climate risk reduction, risk prevention and adaptation strategies

- Public–private partnerships engaging governments, the (re)insurance industry and others to promote catastrophe risk insurance programmes

- The development of risk securitisation to manage climate risks

- The role of risk information, risk awareness and risk communication in helping national and subnational governments, businesses and people make informed decisions on investments and climate risk management

Suggestions for other topics related to climate risks and insurance will be considered for this special issue.

All contributions will go through a peer review process.

Papers should be submitted electronically via the website of *The Geneva Papers* (https://www.editorialmanager.com/gpri/) by **18 January 2021** at the latest.

For further information on *The Geneva Papers*, visit http://www.palgrave-journals.com/gpp/
